Win Update

Keeps your computers protected, helps meet IMO requirements, saves time and money and makes your I.T Team's job easier.

## **MAKES UPDATING WINDOWS SIMPLE**

Missing updates are auto detected, deployed and installed using our own unique maritime-update mechanism.

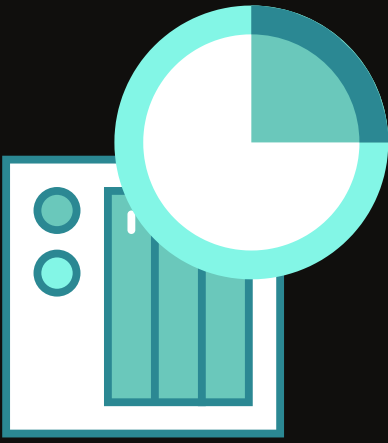

## **AUTOMATED DEPLOYMENT**

Updating is fully automated, without any assistance required from shore or onboard.

## **MINIMUM DATA USAGE, SECURITY UPDATES ONLY**

Updates are filtered so only security KBs are deployed. Updates downloaded once by communications PC and auto-distributed to all other PCs.

## MINIMUM, MANAGED DISK STORAGE

Only 1-2 GB disk space is required compared to WSUS which needs 40GB+. Update storage is handled automatically with old updates being removed after deployment.

## SANDBOXING UPDATES BEFORE DEPLOYMENT

Updates are put through rigorous testing before automatic deployment. Problematic updates are held back until suitable replacement from Microsoft.

## DETAILED REPORTING VIA DASHBOARD

Full update history is visible from Cyber Detective web Dashboard. Users are also alerted to any updates requiring reboot of PC.

## UPDATE END-OF-LIFE VERSIONS OF WINDOWS 10

Upcoming Feature: When on a chosen data-circuit e.g. land-line or 4G+, feature updates are deployed to vessel to upgrade PCs to latest version of Windows 10 version.
